

TEST 3

I. Կարդալ տեքստը և պատասխանել հարցերին՝ ընտրելով ճիշտ տարբերակը:
Read the text and answer the questions choosing the right answer.

Line number

1. Any list of the greatest thinkers in history contains the name of the
2. brilliant German physicist Albert Einstein. His theories of relativity led to
3. entirely new ways of thinking about time, space, matter, energy, and
4. gravity. Einstein's work led to such scientific advances as the
5. control of atomic energy, even television as a practical application of
6. Einstein's work. In 1902 Einstein became an examiner in the Swiss
7. patent office at Bern. In 1905, at age 26, he published the first of five
8. major research papers. The first one provided a theory explaining
9. Brownian movement, the zig-zag motion of microscopic particles in
10. suspension.

11. The second paper laid the foundation for the photon, or quantum,
12. theory of light. In it he proposed that light is composed of separate
13. packets of energy, called quanta or photons, that have some of the
14. properties of particles and some of the properties of waves. A third
15. paper contained the "special theory of relativity" which showed that
16. time and motion are relative to the observer, if the speed of light is
17. constant and the natural laws are the same everywhere in the universe.
18. The fourth paper was a mathematical addition to the special theory of
19. relativity. Here Einstein presented his famous formula, $E = mc^2$,
20. known as the energy mass equivalence. In 1916, Einstein published his
21. general theory of relativity. In it he proposed that gravity is not a force,
22. but a curve in the space-time continuum, created by the presence of
23. mass.

24. Einstein spoke out frequently against nationalism, the **exalting** of one
25. nation above all others. He opposed war and violence and supported
26. Zionism, the movement to establish a Jewish homeland in Palestine.
27. When the Nazis came to power in 1933, they denounced his ideas.
28. He then moved to the United States. In 1939 Einstein learned that two
29. German chemists had split the uranium atom. Einstein wrote to
30. President Franklin D. Roosevelt warning him that this scientific
31. knowledge could lead to Germany developing an atomic bomb. He
32. suggested the United States begin its own atomic bomb research.

1. Einstein's primary work was in the area of
 - a. chemistry
 - b. physics
 - c. biology
 - d. engineering

2. Which of the following inventions is mentioned in the text as a practical application of Einstein's discoveries?
 - a. Radio
 - b. Television
 - c. Automobiles
 - d. Computers

3. According to the text, Einstein supported all of the following except
 - a. the establishment of a Jewish homeland in Palestine.
 - b. atomic bomb research in the United States.

- c. nationalism
 - d. the defeat of the Nazis.
4. In which country was Einstein born?
- a. Switzerland
 - b. Germany
 - c. United States
 - d. Israel
5. What is "Brownian movement"?
- a. The motion of photons in light
 - b. The emission of electrons from solids when struck by light
 - c. The zig-zag motion of microscopic particles in suspension
 - d. The basis of the theory of relativity
6. Einstein was a citizen of all of the following countries **EXCEPT**
- a. United States
 - b. Belgium
 - c. Germany
 - d. Switzerland
7. It is clear from the text that the author feels
- a. Einstein's work in physics was somewhat tarnished by his conservative political views.
 - b. Einstein's work in physics, though theoretically impressive, led to few practical applications.
 - c. Albert Einstein was one of the most brilliant thinkers in history.
 - d. Einstein's theories have been consistently proven incorrect.
8. According to Einstein's special theory of relativity,
- a. all properties of matter and energy can be explained in a single mathematical formula
 - b. time and motion are relative to the observer.
 - c. light is composed of separate packets of energy.
 - d. some solids emit electrons when struck by light.
9. The word **exalting** in line 24 means
- a. criticism
 - b. support
 - c. elevation
 - d. elimination
10. According to Einstein, light is composed of separate packets of energy called
- a. electrons
 - b. photoelectrons
 - c. gamma rays
 - d. quanta
