

ANALYTICAL TESTING LABORATORY OF THE SCIENTIFIC AND EDUCATIONAL CENTER FOR CONTROL AND MONITORING OF THE QUALITY OF MEDICINES

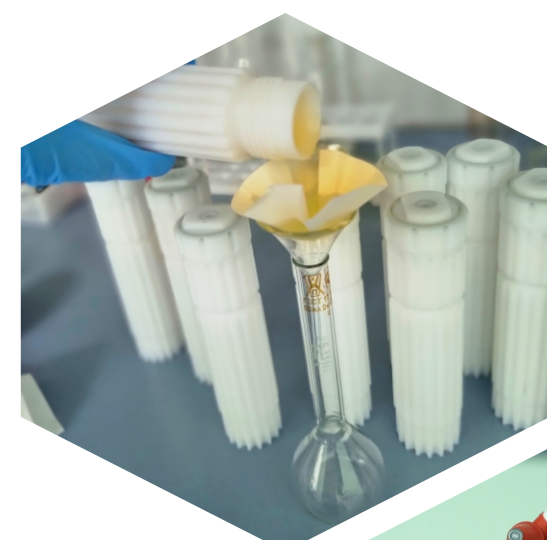

Created in 2021

Accredited in 2024 according to
the GOST ISO/IEC 17025-2019 standard

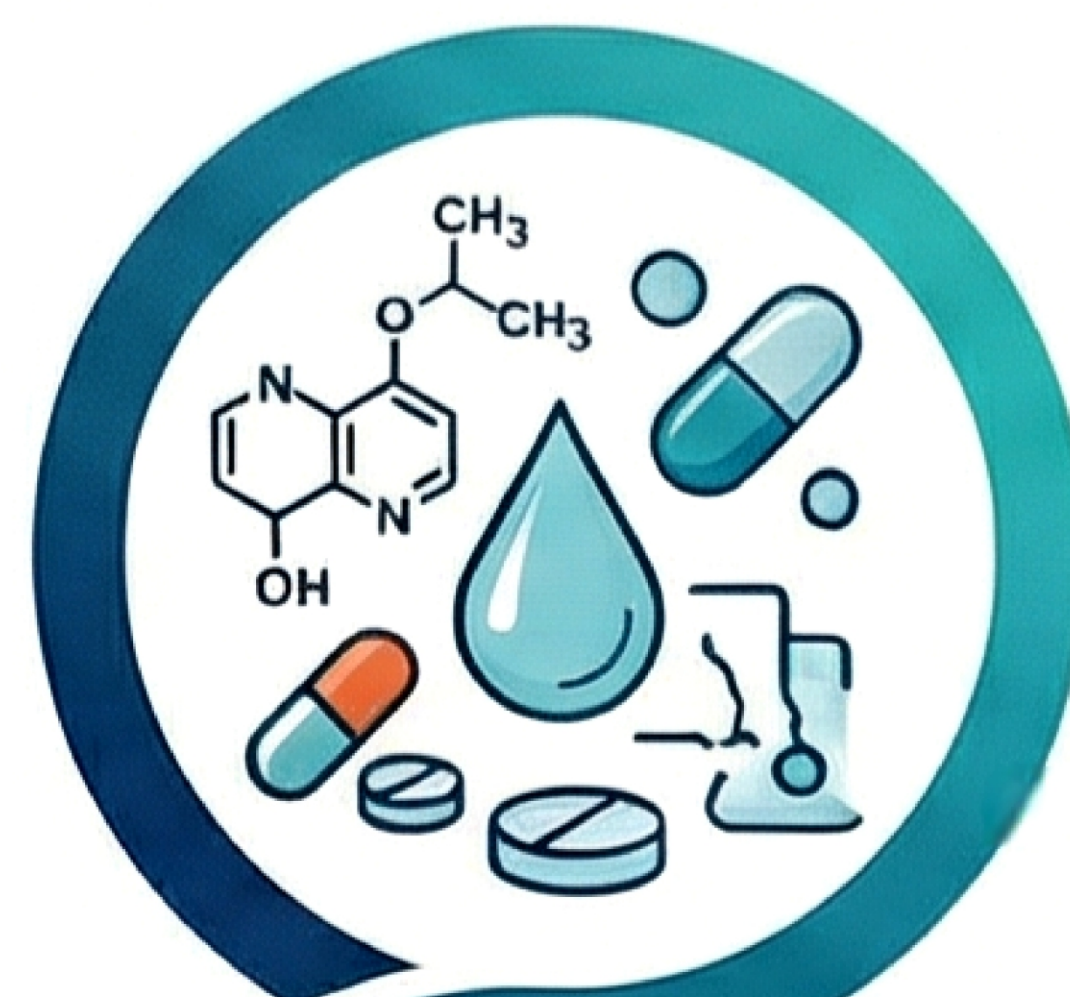

- Validation of analytical methods, preparation of reports
- Determination of mass fractions of active and accompanying components of aqueous ammonia, chloramine, hydrogen peroxide
- Determination of mass fractions of chemical elements in various samples
- Expertise on food, bioactive additives, vegetable raw materials and other matrices

Ecological and Food Research

Quantitative determination
of heavy metals,
persistent organic pollutants,
antibiotics, hormones
and other compounds

Expertise of drugs and pharmaceutical raw materials

Qualitative and quantitative analysis
of vitamins, antibiotics, amino acids
and other substances

- Quantitative and qualitative analysis of essential oils, fatty acids, sugars, alcohols, vitamins
- Authentication of natural and synthetic compounds
- Assessment of chemical and optical purity of compounds
- Analysis of the anionic and cationic composition of samples

Services offered

Non-food product testing

Testing of toys,
disinfectants and
alcoholic beverages
